WHY ATTEND

- [X] Exclusive Insights**
Discover how AI is revolutionizing drug screening and development, personalized treatment options, and diagnostics.
- [X] Tailored Experience**
Engage in sessions focused on AI-driven precision medicine and drug discovery, as well as the ethics of AI accessing private data.
- [X] Networking Opportunities**
Connect with healthcare experts, industry leaders, and peers through personalized matchmaking and a year-round community platform.
- [X] Actionable Strategies**
Learn how practical AI applications can transform patient care, diagnostics, and drug development.

SESSION THEMES

- **AI-Powered Precision Medicine:** Delve into the personalized treatment approaches enabled by AI, tailoring therapies to individual patients based on genetic, environmental, and lifestyle factors.
- **Innovative Drug Discovery and Development:** Explore the role of AI in accelerating the discovery of novel therapeutics, from virtual drug screening to predictive modeling.
- **Ethical and Regulatory Challenges in AI Healthcare:** Examine the ethical considerations and regulatory frameworks necessary to ensure responsible, fair, and compliant use of AI in healthcare.

WHO ATTENDS

Chief Information Security Officer // Chief Information Officer // Chief Customer Experience Officer // Chief Strategy Officer // Chief Operating Officer // Head of Radiology // Head of Oncology // Head of Pathology // Head of Clinical Operations

REINVENTING THE CONFERENCE EXPERIENCE

We started with a blank sheet of paper and 150 conversations with today's business leaders and top VCs. We weren't surprised by the findings: **most conferences are boring**. They're too big, too confusing, too exhausting, and attendees feel like they are constantly missing something.

Even worse, the experience is not worth the investment. Subpar food, glitchy AV and WiFi, lackluster event technology, and obvious pay-to-play speakers leading to a haphazard agenda all impact the single most important aspect of any conference—your ROI.

AT HUMANX, YOU CAN EXPECT:

CONFERENCE THREADING

A threaded programming model, where you live a conference experience completely unique to your sector, function, and needs, but are surrounded by (and at times paired with) industry or functional peers

THOROUGH RECAPPING

On-demand recordings of all sessions, with real-time transcriptions and AI summaries accessible year-round in the state-of-the-art event app

AI PERSONALIZED EXPERIENCES

Personalized, AI-driven suggestions around content, special events, and matchmaking

AI ASSISTANT

"HumanX Memory" which automatically tracks and stores who you met, the companies you spoke with, and which sessions were most helpful

CUTTING EDGE APP

Cutting-edge wayfinding to help locate the people, companies, and content you care about

COMMUNITY

A year-round community of like-minded leaders joining you on this journey

THE HUMANX DIFFERENCE

**Built by the team behind
HLTH and Vive, HumanX is
not your average conference.**

**Informed by years of building
the premier conferences
in the healthcare space,
we're rewriting what it
means to attend, sponsor, or
participate in a conference.**
