

HUMAN[X]

INFRASTRUCTURE @ HUMANX

Discover how AI is optimizing infrastructure across industries, tackling scalability challenges and driving innovation in networking and edge deployment. Don't miss out on unlocking your organization's full potential!

With an agenda informed by groundbreaking proprietary research conducted by HarrisX and HumanX, attendees will leave with confidence and conviction around their AI futures.

FEATURED SPEAKERS

Lila Ibrahim
COO
Google DeepMind

Kevin Weil
CPO
OpenAI

Wendy Gonzalez
CEO
Sama

Jason Warner
CEO
Poolside

WHY ATTEND

- [X] Exclusive Insights**
Explore the integration of AI algorithms across a diverse range of data processes, including enhanced agility and decision making.
- [X] Tailored Experience**
Engage in sessions on AI-driven edge computing, data optimization, and continuous model evaluation.
- [X] Networking Opportunities**
Connect with infrastructure experts, industry leaders, and peers through personalized matchmaking and a year-round community platform.
- [X] Actionable Strategies**
Learn practical approaches to implementing AI in real-time processing, allocating resources, and maximizing performance.

SESSION THEMES

- AI-Driven Edge Computing: Exploring best practices for implementing AI algorithms into edge devices
- Data-Centric Infrastructure Optimization: Addressing the evolution of infrastructure to support data-centric AI applications, from storage to processing
- Scalability, Security, and Cost-Efficiency in AI Infrastructure: Discussing innovative approaches for scaling AI infrastructure while managing costs effectively and ensuring robust security

WHO ATTENDS

Chief Information Officer // Chief Technology Officer
// Vice President, Systems Administration // Vice
President, IT // Network Operations // Systems
Architects

REINVENTING THE CONFERENCE EXPERIENCE

We started with a blank sheet of paper and 150 conversations with today's business leaders and top VCs. We weren't surprised by the findings: **most conferences are boring.** They're too big, too confusing, too exhausting, and attendees feel like they are constantly missing something.

Even worse, the experience is not worth the investment. Subpar food, glitchy AV and WiFi, lackluster event technology, and obvious pay-to-play speakers leading to a haphazard agenda all impact the single most important aspect of any conference—your ROI.

AT HUMANX, YOU CAN EXPECT:

CONFERENCE THREADING

A threaded programming model, where you live a conference experience completely unique to your sector, function, and needs, but are surrounded by (and at times paired with) industry or functional peers

THOROUGH RECAPPING

On-demand recordings of all sessions, with real-time transcriptions and AI summaries accessible year-round in the state-of-the-art event app

AI PERSONALIZED EXPERIENCES

Personalized, AI-driven suggestions around content, special events, and matchmaking

AI ASSISTANT

"HumanX Memory" which automatically tracks and stores who you met, the companies you spoke with, and which sessions were most helpful

CUTTING EDGE APP

Cutting-edge wayfinding to help locate the people, companies, and content you care about

COMMUNITY

A year-round community of like-minded leaders joining you on this journey

THE HUMANX DIFFERENCE

Built by the team behind Money20/20, Shoptalk, and HLTH, HumanX is not your average conference.

Informed by years of building premier industry conferences, we're rewriting what it means to attend, sponsor, or participate in a conference.
